

## Eibach/Bilstein bespoke suspension solutions for PSV armoured vehicles

Each suspension solution has been specifically manufactured, and adjusted, to suit the GVW (gross vehicle weight) of the particular PSV armoured vehicle.

The performance of our bespoke suspension solutions for the PSV Land Cruiser 200, PSV Land Cruiser 70-Series and PSV Hilux, were all fine-tuned by Bilstein and Eibach engineers at the motor industry proving ground in Papenburg, Germany.

Because the suspension kits detailed below have been developed specifically and exclusively for PSV, they are not available from the Eibach and Bilstein catalogues.
